CAREER OBJECTIVE

A university graduate seeking work experiences in a fast-paced environment. Multiple teams/group work experiences throughout my education have contributed to essential collaboration skills. Studying multiple Information Technology oriented subjects while utilising various softwares has provided extensive knowledge in IT. Willing to develop new skills and further expand on my current knowledge in the IT field.

CORE SKILLS

- Excellent communication skills
- Good planning and organisational skills
- Empathetic listener as well as a clear and conscious speaker
- Knows when to ask for help when further assistance is needed
- Strong sense of morality and ethics which ensures honesty and reliability
- Strong commitment to complete tasks and willingness to follow instructions
- Collaborate effectively with peers and make compromises when necessary
- Self-motivated and can work well independently
- Eagerness and ability to rapidly learn and apply new skills
- Understanding of the need of flexibility to meet changing demands
- Good operational analysis and systems evaluation skills
- Ability to think critically and solve complex problems
- Quality control analysis and systems analysis skills
- Ability to work under pressure
- Knowledge and practical use of computer applications
