CAREER OBJECTIVE

A university graduate seeking work experiences in a fast-paced environment. Multiple teams/group work experiences throughout my education have contributed to essential collaboration skills. Studying multiple Information Technology oriented subjects while utilising various softwares has provided extensive knowledge in IT. Willing to develop new skills and further expand on my current knowledge in the IT field.

CORE SKILLS

- Able to effectively prioritise projects with sooner deadlines
- Able to balance school, family and social life
- Able to organise day to day activities
- Empathetic listener as well as a clear and conscious speaker
- Asks for help when further assistance is needed
- Strong sense of morality and ethics which ensures honesty, reliability, and the ability to complete given tasks responsibly
- Able to collaborate effectively with peers and make compromises when necessary
- Strong commitment to complete tasks
- Eager to learn new skills and expand on my current knowledge
- Self-motivated and can work well independently
- Understanding of the need of flexibility to meet changing demands
- Adaptive to changing environments and situations

TECHNICAL SKILLS

Languages	Java, JavaScript, C++, SQL, HTML, CSS, PHP, Python, Ruby
Software	MS Office, Weka, VirtualBox, PuTTY, VS Code, IntelliJ
Operating Systems	Windows 10, Linux (Ubuntu)
Platforms	GitHub, Heroku, Amazon AWS, Google Cloud and GAE
